

**Croton-Harmon Union Free School
District**

**Remote Learning
Plan
2020-21**

Carrie E. Tompkins Elementary School (CET)
Pierre Van Cortlandt Middle School (PVC)
Croton-Harmon High School (CHHS)

Updated 11/30/20

Remote Learning Model

In this model, all Croton-Harmon students will attend school remotely and do not report to the school building. Students will follow a remote instruction schedule that mirrors an in-person schedule with specific scheduled times throughout the day. Remote instruction will provide a combination of live and asynchronous instruction provided by the teacher. Students will engage in substantive interactions with teachers and peers. Principals will be communicating with students/parents about the Remote Learning Model and schedule. Where appropriate, principals will be meeting with student groups to share the schedule.

All students will be expected to:

- Attend each class virtually in its entirety and utilize their camera for the class duration or they may be marked absent by the teacher

- Participate in all classroom discussions and be ready to answer teacher questions

- Complete and submit assignments as directed

- All attendance information will be documented utilizing the school's student information system (SIS) and families will have access to attendance data through the SIS.

- Use technology appropriately as outlined in the District's Acceptable Use Policy (AUP) and adhere to the District's Code of Conduct

All Grades:

A full-time distance learning option will be available for medically fragile students at all grade levels. It is our intent to expand this offering to all students should families feel that this is an appropriate option. Although the guidance is unclear in this area, we will proceed with our planning for this option, unless we receive information from NYSED or an Executive Order that prevents us from offering this remote plan.

Our draft schedules can be viewed at the end of this document. Classes will have a set time and students will follow a schedule. The elementary schedule at Carrie E. Tompkins Elementary School indicates synchronous learning shaded in green. Students will log on and meet with their teachers during those times for instruction. Students will also have time to work independently during the day and may be using asynchronous resources at those times. At Pierre Van Cortlandt Middle School and Croton-Harmon High School, we will have synchronous lessons following a schedule each day. These live learning sessions will follow a specific time schedule. They are designed to meet with half of a class and other times to meet as an entire class.

Therefore, each day students will have live interactions with their teacher. Students will also be assigned independent work and may use asynchronous resources as well.

Numbers of Students

The district has conducted numerous community meetings either through additional board of education meetings or separate community meetings. We have also created several surveys. In our last survey, we asked families to share their comfort level with returning their students to in-person instruction. Based on this survey day, which of course could change based on the COVID-19 status as we move towards the end of August, over 30% of students may avail themselves of the remote model of instruction.

Technology & Internet

It is the goal of the district to provide all students and faculty with their own device for remote learning/instruction.

All devices will be specifically assigned to an individual and distribution information will be logged.

School personnel will coordinate and schedule distribution of and collection of devices that follow social distancing guidelines

Students and faculty will be provided with appropriate protocols and procedures for utilizing district issued devices including the signing of the District's Acceptable Use Policy (AUP).

Internet safety guidelines and digital citizenship will be reviewed with all students. Students are not permitted to record live lessons.

The district Re-entry Task Force surveyed families to determine access to equipment and the internet. The results of the surveys were used to inform the district as to steps to put into place moving forward. Survey questions included but were not limited to:

Does your child have exclusive use of their own device? (A "device" for Remote Learning purposes should be a PC, laptop, or tablet. A smartphone for this survey does not qualify as a device)

Does your child only have access to a device that is shared with other family members?

Does your child have "all the time" access to the internet at a sufficient level to participate in all learning activities at home?

Are you lacking sufficient internet access at home?

If you do not have sufficient internet access at home, what is the primary reason?

Survey results allowed the district to create a structure that would promote equity across the district.

All students in Kindergarten through 8th grade will be given a personal device to access all their school work whether at home or in schools.

All students in grades 9-12 will be offered the option to “use their own device.” For students who choose not to use their own device, a district chromebook will be assigned to them.

Additionally, the district has contracted with a local internet provider to purchase MiFi’s for student use. A MiFi is a wireless router that acts as a mobile Wi-Fi hotspot for students to use at home..

All students will have a device to use and if needed Internet access provided. Building principals will assess if students have additional needs during the remote or hybrid learning model.

Support for Students/Families

All students/families will be provided with documentation on how to use and care for chromebooks. All students will be held accountable with the district Acceptable Use Policy and it will be reviewed with all students at the opening of school.

Additionally the district will be hosting a “how to” website with a video library that students can access at any time if they have questions about how to use district software..

The district also has opened a student help desk for support.

Support for Teachers/Staff

Throughout the summer, teachers have been invited to Professional Development modules on teaching and learning through the various models listed in the Instructional Section of this document..

Teachers have access to a Professional Development website with technology linked to the district website showcasing videos to help support their teaching.

Teachers have access to a web-based help desk 24/7 to support their needs.

Protecting Student Data

To ensure compliance with New York State Ed Law 2D and the recent Part 121 regulation, the district is reviewing all digital tools, platforms and resources to assess that they are in compliance with all Federal and State laws related to student technology use.

A reduced slate of solutions is being deployed for teachers and student use in the district.

IF A STUDENT OPTS FOR REMOTE LEARNING IN LIEU OF IN-PERSON LEARNING:
